Philip Neumann
Full Stack Web Developer

Experienced freelance coder with 5 years of hands-on experience in software development. Proficient in all popular frontend frameworks and well-versed in backend technologies. Adept at building robust, scalable applications and delivering high-quality code. Seeking to transition from freelancing to a dynamic role within a large company to further enhance my skills and contribute to impactful projects.

Selected Experience

-For a full list of experience and project details visit https://moviefan322.github.io

Technical Consultant, Redbank.org

NJ (2024)

- Built an extensiinteractive municipal website for the city of Redbank with a Mongo/Express/Next/Node.js stack. The client wanted to have control over the site content, so there is an extensive admin interface to manipulate all visible content on the website

Technical Consultant, DreamStack

NYC (2024)

- Developed the User Interface for an app that helps patients recovering from laryngectomies to communicate with others. The front end, developed in the Next.js platform, enables the patient to record a message and process it through the machine-learning back-end. The app delivers the message in a more human-sounding voice and allows integration with various chat apps.
- Implemented the CI/CD pipeline that ran tests and deployment before any merging could be done.

Technical Consultant, AI Political Consultants

NYC (2023)

- Built interactive user interface with Next.js/Redux
- Designed and constructed various data visualizations with d3.js
- Wrote extensive logic for customizable analysis of social media data reflecting political candidates popularity and post sentiment.

Technical Consultant, AppStack

NYC (2022-2023)

- Provided support on various projects and applications.
- Performed root cause analysis and resolved application issues.
- Made UI modifications for requested enhancements.
- Performed testing to ensure no disruption on production environment.
- Interpreted foreign code bases to understand issues without disrupting functionality of the code.

Superconductor Week

Remote, (2018-2023)

- Wrote articles about developments in superconductivity; conducted research and interviewed scientists.
- Built and maintained superconductorweek.com
